

Pour Spout Wheelbarrow

Brentwood's Pour Wheelbarrow, the first of its kind on the market, exemplifies their dedication to keeping the user's needs in mind, while manufacturing the best products on the market. Being the first wheelbarrow designed for pouring, it has been widely accepted in the concrete and fence industries.

The Pour Wheelbarrow saves the user both time and frustration with its relatively easy use. Once a two man job, the Pour Wheelbarrow eliminates the need for a guider. Its pour spout ensures that your product will be dispensed cleanly and directly to its target.

Durability will never be in doubt with the thickest gauge pan available and 60" varnished hardwood handles. The user can rest assured the Pour Wheelbarrow can handle the heaviest of jobs with a thick structural steel undercarriage and heavy duty structural steel legs.

Maneuverability is effortless with a selection of tires including the popular 6" pneumatic turf tire, high density flat free tires, and 4-ply tires all with ball bearings and zerk grease fittings.

It's this commitment to quality and innovation to the customer that keeps Brentwood on top of the wheelbarrow and mortar product industry.
