

# ACCUBLOCK<sup>®</sup>

Fastest, Most Efficient Soffit Block System!

## How Our System Works!

For non-ventilated attics, cutting edge Spray Foam contractors are increasing their speed and efficiency of installation by using the AccuBlock as a "spray template" instead of creating a time consuming "soft-wall" from the top-plate to the roof sheeting.

### The Benefits of AccuBlock<sup>®</sup>

- Designed Specifically for Spray Foam Applications
- Efficient Spray Template at the Top Plate
- Will not support Mold or Mildew Growth
- Quick & Easy Installation
- Designed for Unventilated Attics
- Increased Speed and Efficiency of Installation
- Green Listed
- Reduced Labor
- No Callbacks
- Meets EnergyStar Thermal Bypass Checklist Requirements
- Easily Adapts for Ventilated Attic Requirements

In situations where a ventilated traditional or cathedral application is required the foam can be applied directly... AccuBlock is unaffected by the chemical and thermal characteristics of the rapidly expanding foam and its overall design will not distort as the foam expands to its full dimension. Foam and cardboard baffles cannot offer this type of performance.

AccuBlock is made of 100% flame retardant recycled plastic. It is Green Listed and meets EnergyStar requirements. AccuBlock is the preferred choice for New and Retrofit insulation solutions.

Brentwood's high quality products are backed by an in-depth technical support and reliable, responsive sales support.

# ACCUBLOCK®

## Product Specifications

### 22.5" AccuBlock®

Part # ACBP18447

AccuBlock 22.5" x 29" (24" oc)

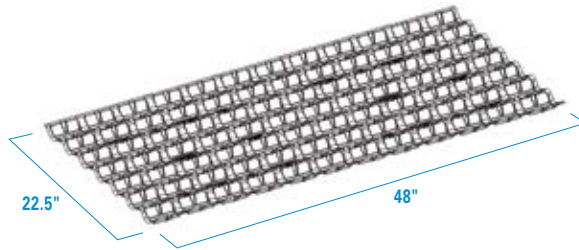

Side Profile

### 22.5" AccuVent® Extension

Part # ACBP18445

Cathedral Extension 22.5" x 48" (24" oc)

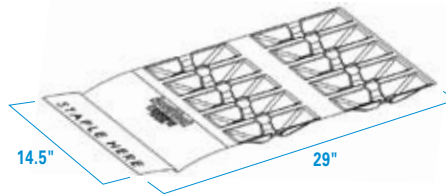

Side Profile

### 14.5" AccuBlock® Starter

Part # ACBP18427

AccuBlock 14.5" x 29" (16" oc)

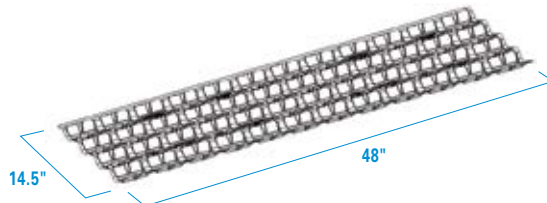

Side Profile

### 14.5" AccuBlock® Extension

Part # ACBP18425

Cathedral Extension 14.5" x 48" (16" oc)

Side Profile

Applications Available For: Traditional Ceilings, Cathedral Ceilings, Stick-Built & Manufactured Homes.

#### Product Data

##### Material:

Active Standard: ASTM D1784-06a

Rigid Polyvinyl Chloride

Self Extinguishing

##### Packaging:

50 AccuBlock = 1 Bundle

112 Bundles = 1 Pallet

1 Pallet = 5,600 AccuBlock

1 Pallet of AccuBlock®  
(5,600 AccuBlock®)

5 Pallets of Cardboard Vents
